DIH api flow

Dependency API required by accessories service

No.	Use case	Current API/Siebel source	Request requirement for new api	Response requirement for new api	New API	ETA
1.	Get Eligible Accessories	1. siebel.cx_elig_atr 2. siebel.cx_elig_atritem 3. siebel.s_product_int	A single GET API that has the following query parameters 1. ibx	Each installed accessory should have the following field or equivalent  <pre>Get eligible ac... se.json 12 Sep 2025, 05:36 AM</pre>	@Sae-Chong Pornthip As per the new design the accessories are defined as available in a country, not as per IBX. So in future the API can give Accessories available for a country based	API Spec Draft expected by ?? @vmu sipatla Received contract https://app.sw

on country code.
Yes, we can use this api which is base on country code.

Also, please share some sample values for "productElementName":

"accessoryName":
"accessoryPartNumber":
"installedAccessoriesId":

so that we can share as per new API what values are mapped to these tags.
